DANXIA

PRINTS, WEAVES & WIDE-WIDTH SHEERS

Taking inspiration from a side of nature rarely explored by the brand, the Danxia collections features textures and patterns that recall the irregularities and shine of geological formations and precious metals, and harmoniously contrasts light and shade, structure and fluidity.

A geological wonder of the world, the Danxia design takes cues from the Danxia Landform Geological Park. The technicolour peaks known as the 'Rainbow Mountains', feature startling red, brown, yellow and green sandstones that fold over each other to create an incredible scene.

PRINTS & WEAVES

The Danxia collection of prints and weaves is luxurious, glamorous and wonderfully modern. Inspired by geological formations and precious metals found in rocks washed up by waves, a play of shape, texture and iridescence give prints and weaves depth and character, further accentuated by the contrast of matt and lustrous yarns.
